AMENDMENTS TO THE SOLICITATION

1. The attachment entitled "REVISED PROJECT SCHEDULE AND ENGINEERING REQMTS" has been added. The text is as follows:

Revised Project Schedule and Engineering Requirements:

General:

- Maximum Term of Performance shall be 442 days from contract issuance.

After contract award:

- Contractor shall update the Project Schedule monthly.
- Contractor will develop system design specifications for the emissions sampling system based on this statement of work.
- Design specifications shall include physical layout, process diagrams, and mechanical and electrical diagrams as appropriate for system components.
- The contractor and EPA personnel will meet at the contractor's site to review system design specifications. EPA personnel will provide comments and feedback during the meeting and in writing within 7 calendar days
- The contractor shall allow for revisions to the system design based upon EPA's review.
- A final design must be submitted to the EPA Project Officer for approval, prior to assembly or build-up of the system.
- Upon approval of the design, the contractor shall begin assembly or build-up of as much as can be accomplished either at the contractor's facility or at the EPA NVFEL without disrupting the activities of Test Cell 2. Where possible, sub-systems or the complete system shall be tested independently by the contractor to verify operation as per the design specifications. Flow meter calibrations should be completed at this time. Controls should be assembled and tested at this time. Modifications may be made to correct for any deficiencies uncovered during this process. EPA personnel should be kept informed during this process. Update meetings may be scheduled as needed.
- A final pre-shipment meeting between the contractor and EPA personnel shall be held at the contractors facility. EPA personnel will provide comments and feedback during the

meeting and in writing within 7 calendar days.

- The pre-shipment meeting shall review system status and findings during the assembly and build-up activity. This meeting will verify that all systems are present at the contractor's facility, assembled and tested to the extent possible, and ready to be shipped to the EPA NVFEL.
- The pre-shipment meeting shall be held no more than 320 days after contract award.
- The contractor shall allow for revisions to system assemblies based on EPA's review.
- Upon completion of assembly and build up, the contractor shall request approval of the EPA Project Officer to ship all equipment to the EPA NVFEL. The contractor shall accept full responsibility for any equipment , supplies, or materials shipped to EPA NVFEL prior to Government approval. The request for shipment shall be received no more than 350 days after contract award.
- Upon completion of assembly and build-up, EPA personnel will schedule a time when EPA on-site activities can begin. This date will be no more than 360 days after contract award.
- Once a date is determined to begin EPA on-site activities, the contractor shall complete the demolition, installation, commissioning, and acceptance testing within 60 days of that date. (EPA review of acceptance test results is not included in 60 day period).
- EPA personnel will review acceptance testing results and notify the contractor in writing as to their approval within 7 calendar days after the receipt of acceptance testing results.
- EPA may waive requirement for meetings if alternate means or data are available to verify performance and compliance with the Statement of Work.

2. The Proposal Due Date has been extended from February 19 to March 19, 2003.

3. Test Cell Floor Plan Drawings are available at the CPOD website.
